

DISPLAY MULTIPLE CONTENT PLAYLISTS ON ONE OR ALL OF YOUR DISPLAYS
SIMULTANEOUSLY, THEN CHANGE, SCHEDULE AND UPDATE THE CONTENT
FROM YOUR OFFICE OR ANYWHERE IN THE WORLD OVER WAN, LAN OR
THE INTERNET. (WIRELESS OPTIONS ALSO AVAILABLE)

Each playlist will play out 24/7 continuously rotating and displaying mixed Video / Image presentations (with audio). With a simple user login, you can instantly change and update your content whenever you desire. Each display stores and plays all content from its built in SSD Hard Drive, not relying any external PC's or devices once the content has been loaded. Our Digital Signage Solutions are 100% reliable and cost effective.
